

## Key Properties

- Compact Size
- Dual Display
- permanent Energy Information
- Low Power Consumption
- Wired and Wireless Connection
- Wall Mount Included

## Description

Antik Digital Bulletin Board is a wall display designed for common areas of apartment buildings to display address information from the apartment building administrator and to block information on energy consumption in the apartment building.

The information displayed on the display is addressable for the given entrance and managed using a superior editorial system to which the apartment building administrator has access. Individual information pages are arranged in order and are displayed sequentially on the larger display in the upper part.

The smaller display in the lower part permanently displays information on energy in the apartment building.

The display has an anti-vandal design with a locking mechanism to prevent it from being hung from the wall. The display is powered by 12V DC and can be connected to the network via WiFi or a network cable.

## Technical Specifications

<b>Screens Dimensions</b>	Main Screen 18.5" Small Screen 10.5"
<b>Power</b>	12V DC 5A
<b>Dimensions and Weight</b>	770 x 12 x 370mm 7 kg
<b>Communication Interfaces</b>	WiFi Ethernet 10/100Mbit
<b>Method of Mounting</b>	Wall Mount via included console
<b>Operating Temperature</b>	-20°C ~ 60°C
<b>Ingress Protection</b>	IP30
